

TRANSPORTATION ENHANCEMENT FUND APPLICATION

Information required by Michigan Department of Transportation, by authority of the
Transportation Equity Act for the 21st Century of 1998, to apply for funding.

MDOT 1701 (9/00)

APPLICANT INFORMATION

1. APPLICANT AGENCY - Must indicate one of the following:

☐ MDOT

☐ Eligible City Agency

☐ Transit Agency

☐ County Road Commission

☐ MDNR

☐ MPO

2. ELIGIBLE APPLICANT NAME

3. SPONSOR(S) (Include information on Attachment I.)

4. PROJECT NAME/ROUTE NO./FACILITY NAME

5. CONTACT PERSON

PHONE NO.

()

E-MAIL ADDRESS

PROJECT DESCRIPTION

6. LOCATION	COUNTY	MDOT REGION (See region map)	CITY/VILLAGE/TWP. (Circle One)
	ROUTE NO./STREET NAME/FACILITY NAME		
	CONTROL SECTION (MDOT projects only)	LENGTH (To nearest tenth of mile)	PROJECT LIMITS (Use Nearest Cross Street)

7. TYPE OF WORK - Describe proposed work in one sentence.

8. PROJECT CATEGORY - Check all boxes that apply. Attachment C must be completed for every project category selected.

NONMOTORIZED

☐ Provision of Facilities for Pedestrians and Bicycles

☐ Preservation of Abandoned Railway Corridors

☐ Research, inventory, mapping, safety and educational activities, and plan development activity

TRANSPORTATION AESTHETICS

☐ Landscape, Wildflower, and Streetscape projects

☐ Scenic Acquisition and Improvement projects

☐ Scenic and Recreational Heritage Routes related projects

WATER QUALITY AND WILDLIFE MORTALITY MITIGATION

☐ Mitigation of Water Pollution Due to Highway Runoff Projects

☐ Wetland Restoration to Address Impacts of Past Transportation Projects

☐ Reduce Vehicle Caused Wildlife Mortality While Maintaining Habitat Connectivity

HISTORIC PRESERVATION

☐ Rehabilitation of Historic Bridges or Other Transportation Resources

☐ Acquisition and/or Interpretation of Historic or Archaeological Sites

☐ Rehabilitation and Operation of Historic Transportation Buildings, Context Studies

☐ Archaeological Planning and Research

☐ Establishment of Transportation Museums

9. IS PROJECT A CONTINUATION OF A PREVIOUSLY AWARDED ENHANCEMENT PROJECT? ☐ Yes ☐ No FILE # _____

10. IS PROJECT A RESUBMITTAL OF A PREVIOUSLY DENIED PROJECT? ☐ Yes ☐ No FILE # _____

11. DOES LOCAL UNIT OF GOVERNMENT SUPPORT PROJECT? (If yes, resolution of support must be included in Att. H.) ☐ Yes ☐ No

12. IS PROJECT ON A STATE HIGHWAY? (If yes, letter of approval from the MDOT region must be included in Attachment H.) ☐ Yes ☐ No

13. IS PROJECT WITHIN A METROPOLITAN PLANNING ORGANIZATION (M.P.O.) BOUNDARY? (If yes, letter of support from the M.P.O. must be included in Attachment H.) ☐ Yes ☐ No

14. DOES PROJECT HAVE SUPPORT OF TRANSPORTATION AGENCY (e.g. county road commission, city street administration, local transit agency) WITH JURISDICTION OVER THE FACILITY? ☐ Yes ☐ No
(If yes, letter of support from the agency must be included in Attachment H.)

15. FUNDS REQUESTED, LOCAL MATCH AND SOURCE

FUNDS REQUESTED	LOCAL MATCH (Must be at least 20% of participating project cost)	TOTAL PARTICIPATING PROJECT COSTS (Funds Requested plus Local Match)
\$	\$	\$
SOURCE OF LOCAL MATCH (Obligated funds, prospective loan, future revenues, DDA, etc.)		NON-PARTICIPATING PROJECT COSTS
		\$
SOURCE OF NON-PARTICIPATING FUNDS		TOTAL (Participating plus Non-participating Costs)
		\$

CHECKLIST

16. CHECK ALL OF THE FOLLOWING ITEMS WHICH ARE ATTACHED:

☐ Attachment A - Description of Proposed Project

☐ Attachment B - Maps, Plans and Photographs

☐ Attachment C - Evidence of Eligibility by Project Category

☐ Attachment D - Benefits of Proposed Project

☐ Attachment E - Environmental Review

☐ Attachment F - Budget and Implementation Schedule

☐ Attachment G - Proposed Maintenance Plans, Agreements and Preservation Covenants

☐ Attachment H - Resolutions of Support and Letters of Approval

☐ Attachment I - Names and Addresses

17. SIGNATURE

NAME and TITLE (Print or Type)

DATE

ATTACHMENT A: DESCRIPTION OF PROPOSED PROJECT

Describe location, proposed work, right of way requirements, transportation relationship and other proposed work.

Attach up to two additional pages, if necessary.

If this application is a resubmittal of a previous unsuccessful application, summarize revisions and note where the details of each change are located.

ATTACHMENT C: EVIDENCE OF ELIGIBILITY BY PROJECT CATEGORY:
NONMOTORIZED, TRANSPORTATION AESTHETICS, WATER QUALITY AND
WILDLIFE MORTALITY OR HISTORIC PRESERVATION

Refer to SPECIFIC PROJECT CATEGORY REQUIREMENTS listed above and address the specific Eligibility and Ranking Criteria as shown in the "Instructions for Applicants." Attach a separate sheet for each project category checked on the APPLICATION FORM.

PROJECT CATEGORY:

ATTACHMENT D: BENEFITS OF PROPOSED PROJECT

Describe benefits of the proposed project.
Attach one additional page, if necessary.

INSTRUCTIONS FOR COMPLETING ATTACHMENT “E” PAGE 1

If environmental documentation has been previously prepared for the transportation enhancement project, attach a copy of the documentation to the application, along with any MDOT or Federal Highway Administration approvals. If no previously approved environmental documentation is available, the applicant must complete Attachment “E”, with the proposed schedule for preparing the environmental documentation. For questions regarding Attachment “E”, contact Heather Hicks at 517/241-3512.

If the transportation enhancement project is part of a transportation project and is intended to enhance that project, provide an environmental review of the transportation project using Attachment “E”.

Applicant's Project I.D. Number: If applicable, include the identification number for the transportation enhancement project(s) assigned by the agency having jurisdiction for the transportation facility.

Location: Include the name of the facility, the project limits, city/village/township, and county.

Description: Describe the scope of the proposed work in as much detail as possible, including areas of impact, grading, right of way required, etc., as appropriate.

Grading permit required: Check if fee right of way and/or grading permits are required. If checked, how much right of way is required? Where are the proposed right of way sites? How many grading permits are needed? Where are the grading sites?

Work outside existing shoulders or curbs: Check if there is ANY proposed work outside the existing shoulder points or curbs, or the existing transit facility. If checked, how far does the work extend? How extensive is the work?

Major new construction: Mark if the proposed project includes any one of the following: bridge construction or replacement; new facility on new location; major new constructions or reconstruction; etc. If checked, what type of new construction is planned?

Description of Setting: Include a brief report of the former and present land uses in the project area and immediately adjacent to the project.

Factors: If there is an impact or effect on a particular factor, mark "yes." If "yes" is marked, a full description of the extent of the impact(s) should be provided on the reverse side of the attachment, under "Impact Evaluation." If there is **not** an impact or effect on a particular factor, mark "no." If "no" is marked, no further review of that factor is necessary; however, the applicant should indicate that the appropriate agency was contacted. If the extent of impact is not known, check yes and explain under "Impact Evaluation."

PLEASE NOTE: The applicant, whether checking "yes" or "no" for impacts on a particular factor, should indicate the source of information whether they contacted local, state or federal agencies in determining whether there would be an impact on a particular factor. For example: The applicant contacts the Michigan Department of Environmental Quality (MDEQ) to determine if there are any hazardous waste sites located in the proposed project area. The MDEQ has indicated that there are no hazardous waste sites located in the project area; thus, the applicant would mark "no" under the impacts on the front side of the attachment, and on the reverse side, the applicant would indicate that they checked with the MDEQ, and there are no hazardous waste sites located in the project area. If the MDEQ had indicated that there were hazardous waste sites located in the project area, the applicant would mark "yes" under impacts on the front side of the attachment, and on the reverse side, the applicant would indicate that they checked with the MDEQ, and there are hazardous waste sites. The applicant would provide a full description of these sites, etc...

Use the following guidelines to identify which factors MAY be impacted by the proposed project. The following questions which can be answered "yes" should be marked "yes" under the "Impact" column on Attachment “E” for the corresponding factor.

INSTRUCTIONS FOR COMPLETING ATTACHMENT “E” PAGE 2

1. **Displacement of Residence or Business:** Will businesses or residences be displaced? If yes, how many and what type? Are the units occupied?
2. **Disruption of Neighborhoods:** Will neighborhoods be split or community facilities separated from residents by a new or widened roadway? If yes, will residents have access to the same or similar facilities after the project is completed, although they may be less convenient to reach?
3. **Agricultural:** Will prime or unique farmlands (including nonactive farmlands) be purchased for proposed right of way? If yes, how much farmland will be purchased? Is the land actively farmed? What type of crop is produced? Is any portion of the project's property enrolled in the Farmland and Open Space Preservation Act, 1974 PA 116 program? Contact the Michigan Department of Natural Resources (MDNR) at 517-373-3328, a local zoning official, or the Soil Conservation Service (517-337-6701) to determine if there are prime or unique farmlands or Act 116 lands on the proposed right of way.
4. **Recreational Lands:** Will any part of a publicly-owned park, recreation area, or wildlife or waterfowl refuge receive grading, or be purchased for proposed right of way? If yes, how much recreational land will be purchased? What type of recreational activity occurs at the site? What activities will still be possible on the remaining property?
5. **Historic/Archaeological:** Will there be work in, or adjacent to, a designated historic or archaeological area? If yes, describe the historic/archaeological site. How will the proposed work affect it? Contact the Michigan Historical Center, Michigan Department of State, Environmental Review (517-335-2721), to learn if there are historic/archaeological sites in the area of the proposed work.
6. **Wetlands:** Will the project place fill material in a wetland? Will the project remove or dredge material from a wetland? Will the project involve construction or development in a wetland? Will the project drain surface water from a wetland? If yes, please describe the type and extent of the work. A permit must be received from the Michigan Department of Environmental Quality (MDEQ) to conduct the above activities in a regulated wetland. A federal permit may be required, in addition to a MDEQ permit, for activities in wetlands adjacent to the Great Lakes and in navigable waters. Examples of projects which would require a permit include crossing wetlands at a new location, the placement of fill, a bridge or a culvert in a wetland, and grade lifts with toe of slope extensions into wetlands. National Wetland Inventory map information can be used to determine the approximate locations of wetlands in a project area. However, because the identification of wetlands primarily involves a determination of site hydrology and vegetation, an on-site wetland delineation is needed to determine the exact locations of wetlands. Contact the MDEQ, Land & Water Management Division, for information regarding their Wetland Assessment Program (WAP) or for a list of wetland consultants providing delineation services at 517-373-8000, or visit [their web page at www.deq.state.mi.us/lwm/grt_lakes/wetlands/wetlands.html](http://www.deq.state.mi.us/lwm/grt_lakes/wetlands/wetlands.html). The processing of a WAP application normally takes 45 to 60 days. WAP applications can not be processed during winter weather conditions.
7. **Streams/Lake/Drains/State Natural Rivers/Federal Wild and Scenic Rivers:** Will the project cross watercourses and require widening, replacing, or constructing a bridge? Will the project require replacing, extending, or constructing a culvert? Will it require channelization of a stream, or any outletting into a watercourse? If yes, describe the type and extent of the work. To decide if the project impacts a state natural river contact the Michigan Department of Natural Resources (MDNR) Forest

INSTRUCTIONS FOR COMPLETING ATTACHMENT “E” PAGE 3

Management Division, Natural Rivers Program at 517-335-3441. To determine if a project impacts a federal wild and scenic river contact the following agencies: Lower Peninsula - U.S. Forest Service at 616-775-8539; Western Upper Peninsula - Ottawa National Forest at 906-932-1330; or the Eastern and Central Upper Peninsula - Hiawatha National Forest at 906-786-4062. If yes is marked on the application, a permit may be required. A Part 301 permit (formerly Act 346 permit) is needed for any activity affecting an inland lake or stream, this permit can be obtained through the Michigan Department of Environmental Quality (MDEQ). To contact the MDEQ regarding information on the Part 301 permit please call 517-373-9244. A Sec.10 permit is needed from the Corps. of Engineers for work in, over, or under navigable water.

8. **Floodplains:** Will the project require widening, replacing, or constructing a bridge? Will the project require extending, replacing, or constructing a culvert? Will it require channelization of a stream, raising the road grade, or placement of road embankment fill at the approach to a bridge or culvert or paralleling of a stream? Will it require improving access to an area near a watercourse? If yes, describe the type and extent of the work. Contact MDEQ's land and Water Management Division at 517-373-1170 to determine if the work is in a base floodplain area. If yes is marked, a permit may be required. A Part 31 permit (formerly Act 245 as amended by Act 167) is needed to occupy, fill, or grade lands in a floodplain; or to construct, dredge, fill, or grade in a high risk erosion area, flood risk area, or designated environmental area; or alter drainage or vegetation.
9. **Stormwater discharge Permits (NPDES):** Projects requiring construction activities which involve 5 acres or more of land disturbance. This will include removing the roadway and exposing the grade, shoulder work, and all work outside the shoulder points. If yes, describe the type and extent of the work. Contact the Michigan Department

of Environmental Quality (MDEQ) Surface Water Division at 517-373-1982 to determine if an NPDES permit is needed.

10. **Coastal Zone/Critical Dunes Protection Area:** Is the project in a county adjacent to one of the Great Lakes or a connecting waterway, and will work extend beyond the existing curb or shoulder? If yes, will the work affect any waterway? If yes, how? Contact the MDEQ's Land and Water Management Division at 517-373-8787 to determine if the project is located within a coastal zone. To determine if the project is located within the Critical Dunes Protection Area, contact the MDEQ's Sand Dunes Program at 517/373-1950.
11. **Endangered Species/Permit Required:** Will there be work outside the existing shoulders or curbs, road widening, bridge widening/replacing, or culvert extending/replacing? If yes, contact the MDNR's Wildlife Division at 517-373-1263 to determine if threatened or endangered plant or animal species are located in the project area. If yes, describe the type, and population, of threatened or endangered animal or plant species are in the project area.
12. **Tree Removal:** Will trees be removed? If yes, is the area of removal residential or does it have important cultural or natural scenic resources? Will tree removal be controversial?
13. **Inconsistent with Local Development Plans:** Is the project consistent with local development plans? Contact the local planning agency or governmental unit to determine consistency with development plans. Describe any inconsistencies with local development plans.
14. **Change in Developed Land Uses:** Will there be any changes in developed land uses due to construction? Will acquisition of right of way reduce the use of any properties (such as reclaiming right of way which a business was using for parking)? If yes, what

INSTRUCTIONS FOR COMPLETING ATTACHMENT “E” PAGE 4

changes will occur? Contact the local planning agency or governmental unit for land use information.

15. **Change in Access Control or Level:** Will the project change access from free to limited (reducing access) or from limited to free (increasing access)? Is the project on a new location (which will provide new access)? Or will it permanently close a local road or any existing driveways? If yes, how will access be changed? Will there be a loss or change of parking? If yes, describe.
16. **Change in Facilities for Pedestrians or Bicyclists:** Will existing pedestrian and/or bicyclists facilities be changed or removed? If yes, describe. Will any pedestrian/bicyclist facilities still be available?
17. **Detour/Temporary Road/Ramp Closure:** Will a detour, temporary road or ramp closure be needed? If yes, which streets will be used for the detour, how long will the detour last, how long is the detour route, and what upgrading is needed to prepare for the detour (such as signalization or street improvements)?
18. **Hazardous Waste:** Will there be grading? Is right of way needed? Contact the MDEQ’s Environmental Response Division at 517-373-9540 to determine if hazardous waste sites are located in the project area (including grading and proposed right of way sites). If there are, describe the sites and the extent of contamination. A site inspection should also be conducted to determine possible contamination. Any contamination discovered during the course of the project is the responsibility of the applicant, and all costs and regulatory requirements associated with any contamination are to be borne by the applicant.
19. **Noise:** Will a detour be used? Will there be major new construction? Or will the project move traffic closer to residences, schools, churches, or other noise-sensitive sites? Will future traffic increase noise levels at sensitive sites? If yes, what change in noise

levels is expected? Will increases be temporary or permanent?

20. **Air Quality:** Will a detour be used? Will there be major new construction? Or will the project move traffic closer to residences, schools, churches, or other sensitive sites? Will future traffic decrease air quality levels at sensitive sites? If yes, what change in air levels is expected? Will decreases be temporary or permanent?
21. **Subject of Controversy:** Are there any issues which may cause controversy? Has opposition already developed? If yes, what is the subject, and extent, of the controversy?
22. **Any Other Issue:** Are there any special issues which may affect the proposed project? If yes, describe the issue and how it may affect the proposed project.

Impact Evaluation: If "yes" is marked, a full description of the extent of the factors' impacts must be provided. If “no” is marked, indicate what agencies were contacted to determine no impact, or reason for no impact.

Proposed schedule: If the cumulative impacts of all the factors indicate that an Environmental Assessment (EA) or Environmental Impact Statement (EIS) is warranted, or the applicant has determined that an EA or EIS is otherwise necessary, indicate the proposed schedule for completing these items.

SOCIAL, ECONOMIC AND ENVIRONMENTAL FACTORS FOR TRANSPORTATION PROJECTS

This information required by Public Act 231 of 1987, as amended.

Complete this form if Environmental Documentation has not been approved by the Federal Highway Administration (FHWA) or the Michigan Department of Transportation (MDOT).

PLEASE REFER TO THE INSTRUCTIONS.

APPLICANT PROJECT NUMBER (If Applicable)	FOR OFFICE USE ONLY	
	APPLICATION I.D. NO.	DATE RECEIVED

PROPOSED PROJECT

LOCATION (Route number/streetname, termini, length, city/village/township, county)

DESCRIPTION (Include details of all proposed construction, including areas of impact, grading, ROW required, etc., as appropriate.)

☐ ROW/Grading Permit Required ☐ Work Outside Existing Shoulders/Curbs ☐ Major New Construction

DESCRIPTION OF SETTING (Briefly describe the social, economic and natural environmental setting of the project area.)

REVIEW OF ENVIRONMENTAL FACTORS (Refer to Impact Evaluation for additional information).

Under Review of Environmental Factors, if no involvement, check "No". If involvement is anticipated or unknown, check "Yes" and describe impact in full under Impact Evaluation on the reverse side. List source of information for all factors, both those determined to have no impact and those with an impact.

may have no impact and those with an impact:
